DEPARTMENT OF PESTICIDE REGULATION

FIFRA 24(c) Special Local Need Label (SLN)

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF CALIFORNIA

For control of mites and thrips on indoor (greenhouse and artificially illuminated controlled atmosphere environments) and outdoor grown cannabis and hemp.

Trade Name: General Hydroponics Prevasyn™ Insect Repellent/Insecticide

EPA Reg. No. 91865-1
EPA Est. No. 239-IA-003

SLN No. CA-170005

Firm Name: General Hydroponics
2877 Giffen Ave
Santa Rosa, CA 95407

This label expires and must not be distributed or used in accordance with this SLN registration after **December 31, 2022.**

DIRECTIONS FOR USE

ATTENTION

- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA-registered label for General Hydroponics Prevasyn™ Insect Repellent/Insecticide, (EPA Reg. No. 91865-1) and this label.

Location: Statewide

Crop/Site/Commodity: Indoor (greenhouse and artificially illuminated controlled atmosphere environments) and outdoor grown cannabis and hemp.

Target Pest/Problem: Controls the following insect and mite pests:
MITES (Two-spotted spider mites)
THRIPS (Thrips spp., Frankliniella spp., and Heliothrips spp.)

MIXING AND APPLICATION

Mixing: Shake well before using. Add required amount of General Hydroponics Prevasyn™ Insect Repellent/Insecticide to a clean spray tank with at least one-

half of the water to be sprayed. Agitate the mixture thoroughly, add other products and then fill the tank with the remaining water and continue agitation.

Always use this product promptly after mixing with water and do not let tank mix sit for more than 6 hours.

Use water for dilution with a pH less than 8.

General Hydroponics Prevasyn™ Insect Repellent/Insecticide has been found to be compatible with most commonly used pesticides. To avoid problems, conduct a compatibility test before using this product in a tank mix with other pesticides. To test for compatibility, mix a small amount of each product, in the appropriate proportions, in a small jar. **All tank mix products must be allowed for use on cannabis and hemp in California.**

Application:

To apply General Hydroponics Prevasyn™ Insect Repellent/Insecticide, spray all foliage surfaces until thoroughly wet, but do not allow spray to run off.

Apply General Hydroponics Prevasyn™ Insect Repellent/Insecticide as directed up to and including the day of harvest.

FIELD AND GREENHOUSE USE

Stand Alone: Dilute 1-2 teaspoons (5-10 ml) of General Hydroponics Prevasyn™ Insect Repellent/Insecticide per gallon (3.8 liters) of water and apply by spraying every 4–7 days when used as a preventative management tool or in an integrated pest management system. **Do not apply more than 1 ½ fl. oz. (43.5 ml) per 1,000 sq. ft. per application.**

When pest pressure is heavier, use higher rates and consider tank mixes with other insecticides or miticides.

Tank Mix:

When tank mixing, read and carefully follow all applicable use directions, precautions and limitations on the respective product labels. In interpreting all labels for the tank mix, the most restrictive situations must apply.

When tank mixed with other insecticides or miticides, General Hydroponics Prevasyn™ Insect Repellent/Insecticide will provide improved levels of control increasing pest exposure to those products due to its irritant effect. General Hydroponics Prevasyn™ Insect Repellent/Insecticide is recommended to tank mix with contact insecticides/ acaricides, including those with suffocating/desiccating, insect neurotoxin, and insect growth regulating modes of action.

Mix General Hydroponics Prevasyn™ Insect Repellent/Insecticide at a rate of ½ teaspoon (2.5 ml) per gallon (3.8 liters) of water with other chemical or biological insecticides or miticides.

When pest pressure is heavier, use higher rates.

Restricted Entry Interval (REI): Do not enter or allow worker entry into treated areas during the restricted entry interval of 4 hours.

Pre-Harvest Interval (PHI): General Hydroponics Prevasyn™ Insect Repellent/Insecticide can be applied up to and including the day of harvest.

Other Restrictions:

1. Do not apply this product through any type of irrigation system.
2. This product must only be applied using equipment that is specifically designed and manufactured for applying pesticides.
3. Use of this product may pose a hazard to endangered or threatened species. Before applying this product, applicators must obtain information regarding the proximity of endangered species habitats and follow any applicable use limitations. For details, contact your County Agricultural Commissioner or refer to the Department of Pesticide Regulation's PRESCRIBE Internet Database: <http://www.cdpr.ca.gov/docs/endspec/prescint.htm>

NOTICE ON CONDITIONS OF SALE

The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Plant injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or misuse of product, all of which are beyond the control of General Hydroponics. To the extent consistent with applicable law, General Hydroponics makes no other express or implied warranty of merchantability or fitness for a particular purpose nor any other express or implied warranty.
